ABSTRACT

This document details the recorded student data from the 48 institutions in the Illinois Community College System. Student data is collected twice during the fiscal year by the colleges--fall opening enrollments and end-of-fiscal-year annual student enrollment and completion figures. Report highlights include: (1) In 2001, Illinois community colleges showed 340,101 students enrolled at the start of the fall semester and 666,491 students who took courses during the entire fiscal year--students enrolled in non-credit courses increase the total to 979,585; (2) Females made up 55% of the total student population enrolled in credit courses; (3) Minority (non-white) students accounted for 35% of all enrolled credit students; (4) The average age of all students was 31.6 years; (5) Thirty-five percent of the credit students were enrolled in a college transfer program; (6) Occupational credit programs accounted for 27% of the credit student enrollment; (7) Nearly 12,900 transfer degrees and 24,633 occupational degrees and certificates were awarded during the 2001 fiscal year; (8) Females accounted for 58% of the graduates; (9) Minorities earned 29% of the degrees and certificates awarded; and (10) More than half (57%) of the enrolled credit students expressed no intent to pursue a degree. The report includes statistics by individual colleges and programs. Statistics on student demographics, grades, standardized test scores, and educational objectives are also provided. Appended are credit enrollment data tables, noncredit course enrollment data tables, and completion data tables. (MKF)

Student Enrollments & Completions Fiscal Year 2001

INTRODUCTION

The colleges in the Illinois Community College System submit detailed student records twice during each fiscal year. Fall opening enrollment (E1) data for credit-generating students are recorded by the colleges at the end of the regular fall registration period, which is usually the 10th day of the term. Annual student enrollment and completion (A1) data are reported for all students who are officially enrolled at the college in credit coursework at any time during the fiscal year. An A1 record is also submitted for students who graduate, but are not officially enrolled during the year. The N1 submission includes data on noncredit course enrollment. Fiscal year 1999 marked the first year that the Illinois Community College System had undertaken a noncredit course enrollment database to house demographic information on the wide range of noncredit instruction provided annually. As with any new data collection initiative of this magnitude, one can expect a transition period where gradual improvements are made to the process of gathering and reporting the array of requested data. Previously, since fiscal year 1994, only aggregate noncredit enrollment data have been gathered through the use of a yearly survey. During the transition period, both detailed data (N1) and aggregate data (paper survey) are being gathered.

Fall enrollment data provide a point-in-time or "snapshot" of opening fall term enrollment allowing year-to-year and institution-to-institution comparisons and are comparable to fall enrollment data in postsecondary institutions nationwide. Looking at the fall and annual data for fiscal year 2001 shows the substantial differences between the coverage of these submissions for Illinois community colleges. During the fall term included in fiscal year 2001, there were 340,101 students enrolled in credit coursework in public community colleges at the start of the semester. During the entire fiscal year 2001, a total of 666,491 students took credit coursework at the colleges. Hence, just over one-half of the students who attended a community college during the entire fiscal year 2001 were enrolled at the beginning of the fall term. Stated another way, community college annual enrollments are nearly twice as large as the fall credit opening enrollments reflect. In the noncredit arena, the differences are even more pronounced as fall noncredit data only accounted for 35.1 percent of the annual 2001 noncredit enrollments. Hence, to more fully capture the impact of the community college system, the focus should be on annual data.

The diversity of the community college system and its students are best captured in annual student enrollment and completion records. This is because the age, attendance patterns, and goals of the community college student are unconventional. Students "stop in and out" of college according to their individual needs and may not always be enrolled at the beginning of a fall semester. The increase in module classes adds to the complexity of tabulating student enrollments at any given point-in-time. Additionally, with elevated emphasis on student outcomes and program effectiveness, analyses of student completions have become increasingly important. Therefore, the analyses in this report focuses on annual enrollment and completion data in an effort to secure the most comprehensive and accurate information available.

This year's report is based on fiscal year 2001 enrollments and completions. For comparison with past enrollments and completions, summary data for the four previous fiscal years (1997-2000) are also presented. Detailed tables comparing fiscal year 2000 and fiscal year 2001 credit headcount, full-time equivalent (FTE) enrollments, and graduates by college are included. More detailed tables for noncredit course enrollments will become available for future reports as the noncredit database evolves. FTE enrollments in this report are based on all credit hours attempted (including nonreimbursable credit hours).

Student Enrollments & Completions Fiscal Year 2001

HIGHLIGHTS OF THE FISCAL YEAR 2001 ANNUAL REPORT

Student Enrollments

- ▶ The Illinois Community College System recorded a total of just under one million (979,585) students in credit and noncredit courses in fiscal year 2001, a decrease of 2.8 percent since fiscal year 2000.
- ▶ Credit-generating students accounted for just over two-thirds (68.0 percent) of the overall fiscal year 2001 headcount.
- ▶ During fiscal year 2001, the 48 public community colleges in Illinois enrolled 666,491 students in instructional credit courses. This is a very slight decrease of 0.3 percent from the previous year. The full-time equivalent (FTE) enrollment was 226,735, an increase of 4.3 percent since fiscal year 2000.
- ▶ Statewide, 32,371 noncredit course sections were conducted during fiscal year 2001.
- ▶ From fiscal year 2000 to fiscal year 2001, the number of individuals receiving instruction through noncredit course offerings decreased 7.7 percent to 313,094 students.
- ▶ Statewide, 36,964 students of the 979,585, enrolled in both credit and noncredit courses during fiscal year 2001 (A1 and N1). While there is some overlap, these data suggest that credit and noncredit courses are meeting largely different student and community needs.
- ▶ Females comprised 55.3 percent of the fiscal year 2001 student population enrolled in credit-generating programs.
- ▶ Minority (nonwhite) students accounted for 35.3 percent of the credit students enrolled, almost 1 percent (0.9) more than in 2000. Black student representation dropped slightly from the previous year and was at its lowest (13.9 percent) in the past five years. Participation by Hispanic students increased by more than 9 percent. Asian student participation was unchanged, while foreign/nonresident alien participation was down substantially (32.0 percent).
- ▶ The median age of credit-generating students was 26.8 during fiscal year 2001, slightly younger than the previous year. Likewise, the average age decreased slightly to 31.6 years.
- ▶ Baccalaureate/transfer remained the largest credit instructional program area enrolling 34.9 percent of fiscal year 2001 Illinois Community College System students. Enrollments in baccalaureate/transfer programs increased 2.6 percent from last year.
- ▶ Statewide, occupational credit program enrollments accounted for more than one-quarter of all credit students (26.7 percent). Enrollments in occupational programs increased 0.8 percent from the previous year.
- ▶ Although 34.9 percent of the fiscal year 2001 credit student population was enrolled in the baccalaureate/transfer area, only 26.3 percent of all students indicated an intent to transfer.
- ▶ Students enrolled in adult education courses in community colleges comprised 19.8 percent of the credit generating students. Enrollment in adult education increased by 6.6 percent over fiscal year 2000.
- ▶ Of the students in adult education, nearly 58 percent were enrolled in English as a Second Language (ESL) courses. In fiscal year 2000, only 54.8 percent of community college adult education enrollees were involved in ESL.
- ▶ More than one-half (56.7 percent) of the fiscal year 2001 credit students enrolled in Illinois community colleges indicated that they were not pursuing a degree, but attending only to complete one or several courses. Participation in college with a focus on taking courses instead

HIGHLIGHTS OF THE FISCAL YEAR 2001 ANNUAL REPORT

(Continued)

Student Enrollments

of degree or certificate completion decreased by only 0.4 percent over last year.

- ▶ About three out of four credit students attended on a part-time basis during both the fall (73.2 percent) and spring (75.3 percent) semesters in fiscal year 2001.
- ▶ Over 17 percent of the credit-generating students are known to already have earned some type of college certificate or degree. This includes 34,351 who earned a bachelors degree or higher which is an increase of 436 over last year.
- ▶ Illinois community college students were enrolled in 6,585,336 credit hours throughout fiscal year 2001 and earned over 73 percent of those hours.
- ▶ Accumulated credit hours were available for 65.5 percent of the fiscal year 2001 student population. Of that percentage, 32.2 percent had accumulated 30 or more college-level hours (sophomore level).
- ▶ Cumulative grade point average data was reported for 60.8 percent of the fiscal year 2001 students. Over 46 percent (46.6) held an A-B average.
- ▶ Noncredit course enrollment figures in the report for fiscal year 2001 are the higher value of information generated by the Noncredit Course Enrollment Data submission (N1) or the Annual Noncredit Enrollment Survey. The collection of noncredit individual student data submission (N1) is evolving and are expected to become increasingly complete in the future.

- ▶ Fiscal year 2001 unduplicated noncredit headcount decreased 7.7 percent over last year. Similarly, the duplicated headcount or

“seatcount” was 11.7 percent lower than the previous year.

- ▶ Female students accounted for 57.0 percent of 2001 noncredit enrollments for which gender data were reported.
- ▶ Minority students accounted for just over one-quarter of the individuals enrolled in noncredit programs who supplied racial/ethnic data.
- ▶ Nearly one-half of the noncredit students were 40 years of age or above.
- ▶ Nearly 50 percent of the noncredit offerings were in the personal and social development category of activity. Nearly 35 percent of the noncredit coursework were dedicated to developing workplace skills: professional/vocational (23.6 percent) and business and industry contractual training (11.1 percent).
- ▶ Across all categories of activity, eight programs (two-digit CIP) had over 10,000 noncredit students enrolled. These eight program areas accounted for approximately 81 percent of the students enrolled in noncredit courses where CIP data were reported. Nearly one-third of these enrollments are in work-related programs: business management (16.8 percent), transportation workers (6.2 percent), computer information systems (4.2 percent), and health professions (3.8 percent).
- ▶ Instructional site information shows that 57.6 percent of the noncredit courses offered in 2001 were held on main college campuses.
- ▶ Collegiate-level degrees and certificates were awarded to 38,420 students at Illinois community colleges in fiscal year 2001, 10.4 percent more than in fiscal year 2000.

Student Enrollments & Completions
Fiscal Year 2001

HIGHLIGHTS OF THE FISCAL YEAR 2001 ANNUAL REPORT

(Continued)

Student Completions

- ▶ Nearly 12,900 baccalaureate/transfer degrees were earned during the fiscal year, no change since 2000. Baccalaureate/transfer degrees accounted for 33.4 percent of all completions.
- ▶ Approximately 64 percent of all fiscal year 2001 collegiate degrees and certificates were earned through completion of occupational programs.
- ▶ Students successfully completed 24,633 occupational degrees and certificates in Illinois community colleges during fiscal year 2001, an 18.0 percent increase from the previous year.
- ▶ Thirty-four percent of the occupational degrees and certificates awarded in fiscal year 2001 were associate in applied science degrees.
- ▶ Females accounted for 58.3 percent of all completions during fiscal year 2001. A similar proportion was reflected in the baccalaureate/transfer and occupational program areas.
- ▶ The largest number (5,569) of male completers of a specific degree or certificate was in the category of occupational certificate of less than 1 year program. However, the majority of those receiving certificates of less than 1 year (51.1 percent) were female.
- ▶ Although small in number (92), the Associate in Engineering Science program had the highest proportion of male graduates (92.4 percent).
- ▶ Minority students earned 29.3 percent of the collegiate-level degrees and certificates granted in the Illinois Community College System during fiscal year 2001. Black students achieved 16.0 percent, Hispanic students earned 7.1 percent, and Asians earned 5.1 percent of the degree and certificates.
- ▶ Minorities accounted for 16.3 percent of the total baccalaureate/transfer degree recipients. Black students accounted for 7.2 percent, 5.6 percent were Hispanic, and 2.7 percent were of Asian origin.
- ▶ A larger number of minority graduates was found in the occupational area (8,679) than in the baccalaureate/transfer area (1,463).
- ▶ Among the largest minority groups, Black students completed more than twice as many collegiate-level programs than Hispanic students.
- ▶ Over 14 percent of the students who were awarded degrees and certificates during fiscal year 2001 were less than 21 years of age. The age groups with the largest percentages of graduates were the 21 to 24 (31.3 percent), 25 to 30 (18.2 percent), and 40 to 55 year olds (17.0 percent).
- ▶ The proportion of occupational graduates increased as age advanced.
- ▶ Over 72 percent of the students who successfully completed baccalaureate/transfer degrees in fiscal year 2001 indicated an intent to transfer to a four-year institution.
- ▶ Nearly 20 percent (19.8) of the fiscal year 2001 AAS degree graduates indicated their goal was to only complete one or several courses or finish a certificate, *not* to earn an associate degree. This demonstrates that students sometimes alter their goals as they progress through the community college system.

OVERALL FISCAL YEAR 2001 STUDENT ENROLLMENTS

The Illinois Community College System recorded a total of just under one million (979,585) students during fiscal year 2001. This overall enrollment figure, which includes student enrollments in credit and noncredit courses, decreased 2.8 percent since fiscal year 2000. This was the first decrease in enrollment over the past five years; however, fiscal year 2001 totals are 4.3 percent higher than those reported in fiscal year 1997. The decrease from 2000 to 2001 may be due partly to the increasingly stringent data collection requirements involving noncredit information.

Table 1 provides a summary comparison of fiscal year 1997 through fiscal year 2001 credit and noncredit unduplicated enrollments. Total enrollments do not reflect those students who may be concurrently enrolled in credit-generating and noncredit courses during the fiscal year.

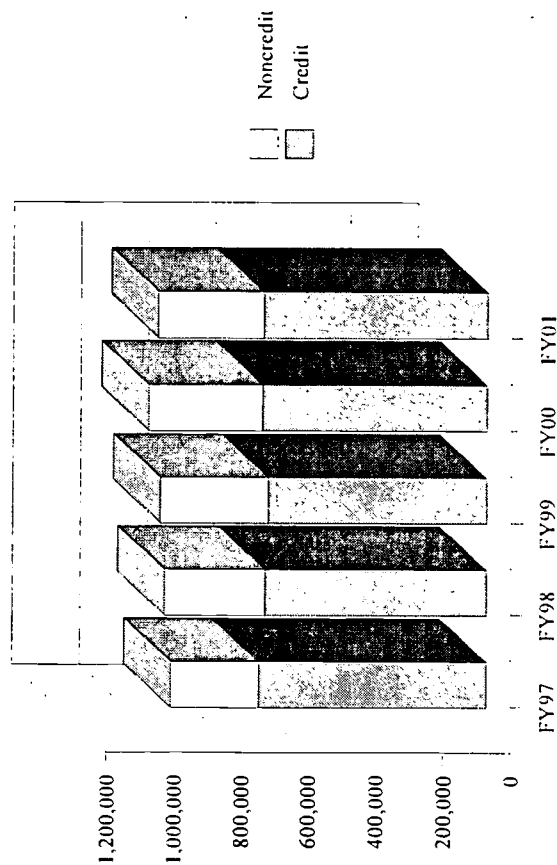

Fig. 1. Overall Annual Enrollments, FY 1997-2001

Comparisons of fiscal year 1997 through fiscal year 2001 unduplicated credit and noncredit headcount enrollments for each community college are provided in Appendix tables A-1 and B-1, respectively.

As depicted in Figure 1, credit-generating students account for slightly more than two-thirds (68.0 percent) of the overall fiscal year 2001 headcount. An examination of the five-year period indicates that the proportion of credit-generating students has decreased 4.1 percent since fiscal year 1997, when the proportion of credit-generating students was just under three-fourths (72.1 percent) of the overall student population. Proportionate noncredit enrollment growth is evident in every year between 1997 and 2001 with the exception of the most recent fiscal year. The implementation of more stringent data collection requirements may be contributing to the decrease.

Statewide, 36,964 students of the 979,585, enrolled in both credit and noncredit courses during fiscal year 2000 (A1 and N1). While there is some overlap, these data suggest that credit and noncredit courses are meeting largely different student and community needs.

Annual Noncredit Enrollment Surveys or N1 Records

FISCAL YEAR 2001 STUDENT CREDIT ENROLLMENTS

Student Credit Enrollment by Community College

Annual enrollment for fiscal year 2001 was 666,491, and full-time equivalent (FTE) students totaled 226,735. Table 2 contains comparative enrollment data for the last five years. Fiscal year 2001 total headcount enrollment decreased by only 0.3 percent from the previous year, but fiscal year 2001 FTE enrollment increased by 4.3 percent. Headcount enrollments have decreased 1.6 percent since 1997, while FTE enrollments increased 3.7 percent. Headcount enrollments were at their highest at 727,310 in fiscal year 1992. FTE enrollments peaked at 237,762 in fiscal year 1993, little change has occurred the past four years.

Table 2 COMPARISON OF ANNUAL CREDIT ENROLLMENTS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FISCAL YEARS 1997-2001					
	<u>FY 97</u>	<u>FY 98</u>	<u>FY 99</u>	<u>FY 00</u>	<u>FY 01</u>
Headcount	677,314	659,069	650,605	668,676	666,491
% Change	0.3%	-2.7%	-1.3%	2.8%	-0.3%

% Change	0.5%	-0.6%	-0.3%	0.3%	4.3%

SOURCE OF DATA: Annual Enrollment (A1) Records

Table A-1 in the appendix provides a comparison of fiscal year 1997 through fiscal year 2001 headcount enrollments for each community college. Note that the last reported Metropolitan Community College figures from fiscal year 1999 only include fall 1998 data, which was the last semester the college operated. Since that time, the East St. Louis Community College Center (ESLCCC) has been providing educational programs and services to area residents through cooperative efforts of other higher education institutions. Enrollment and completion figures for the ESLCCC are included in the records of the colleges providing the

programs and services. Of the 48 community colleges, 21 colleges experienced increases in headcount, while 22 exhibited decreases during the past year. Five colleges experienced little or no change (1.0 percent or less) over the last year. Table A-2 contains a comparison of FTE enrollments for the five-year period, indicating 20 colleges with increases, 17 with decreases, and 11 with little change.

Male/Female Distribution

The male/female distribution of students typically fluctuates little from year to year. Females comprised 55.3 percent of the student population in fiscal year 2001. The percentage of male students has averaged 44.3 percent over the past five years. (See Table A-3.)

Ethnic Origin

In fiscal year 2001, just over one-third (35.3 percent) of those attending credit courses in community colleges were minority (nonwhite) students. Current data show that minority representation increased slightly (0.9 percent) over last year. During the past five years, minorities have comprised an average of about one-third (34.1 percent) of the student population. The fiscal year 2001 minority participation increase is largely due to proportionate increases in Hispanic (9.3 percent) student participation. While a large share of this increase was due to enrollment in ESL, Hispanic enrollment in other program areas has also increased. Hispanic students (now numbering 105,124) became the largest minority group in 2000 followed by Black students (now numbering 91,860). In fiscal year 2001, proportionate representation by African American students was at its lowest (13.9 percent) level in the past five years. (See Table A-4.)

Student Age

The average age of the Illinois community college student was 31.3 years in fiscal year 2001, slightly lower than in fiscal year 2000. The median age was 26.8 years, which is slightly younger than last year. The largest proportion of students (22.9 percent) was in the 17-20 year old category. Once the third largest group (fiscal years 1994-1996), the next in size, 21-

24 year old students (20.5 percent), remained fairly constant. The next largest age group by proportion, 40-55 (18.8 percent), also remained constant. The next two groups by proportion, 31-39 (16.3 percent) and 25-30 (15.9 percent), remained relatively unchanged. The 31-39 year old group had previously (fiscal years 1994-1996) been the second largest age bracket. Always the smallest in size, the 16 and under age group grew substantially (27.0 percent), but still represented only 0.8 percent of the student population in fiscal year 2001. (See Table A-5.)

Summary of Enrollments by Instructional Program Area

The baccalaureate/transfer program is the largest instructional program offered in the Illinois Community College System. Statewide, this program area increased 2.6 percent in the past year, but is down 3.2 percent between 1997 and 2001. An examination of the longer term trend data reveals a large increase in the total number of baccalaureate/transfer students in 1994, followed by two years of level enrollments and then a substantial drop in the transfer program category for 1997. Further study reveals that the large shift in enrollments was due to the inclusion of adult education (specifically English as a Second Language) students in the baccalaureate/transfer programs at City Colleges of Chicago in 1994 through 1996. Then in 1997, Chicago switched category usage back to adult education, along with an expanded use of general studies programs. Changes by the City Colleges of Chicago in the use of general studies (decrease) and vocational skills (increase) were noted in the 1999 submission. On a more positive note, the programmatic distribution of enrollments in Chicago's fiscal year 1999 and 2000 submissions shows continuity in how students were classified.

Occupational programs are the second largest credit program in the Illinois Community College System. Occupational enrollments increased 0.8 percent from last year and increased 0.6 percent over the five-year period. In the past year, enrollments decreased in vocational skills (11.4 percent) programs. Enrollments decreased substantially in general associate degree programs (-22.8 percent) and slightly in general studies certificates (-0.2 percent) (See Table A-6a).

Students enrolled in adult education courses comprised 19.8 percent of the credit generating students in fiscal year 2001. Hence, nearly one out of five community college students is enrolled in adult education skills building coursework. Statewide, there was a 6.6 percent increase in adult education enrollments over the previous year. In fiscal year 2001, nearly 58 percent of the students in adult education were enrolled in English as a Second Language (ESL) courses. In fiscal year 2000, 54.7 percent of adult education enrollees were involved in ESL.

The City Colleges of Chicago account for nearly 45 percent of statewide community college adult education enrollments. Adult education enrollments at the City Colleges of Chicago increased compared to last year (2.4 percent). This despite the slight decrease in overall enrollment (-0.6 percent) for Chicago colleges. Excluding the City Colleges of Chicago, there was a 10.2 percent increase in adult education coursetakers over fiscal year 2000. Hence, across the rest of the community college system, adult education enrollments are showing growth. (See Table A-6a and A-6b)

Across all instructional program areas, overall between 1997 and 2001 excluding City Colleges of Chicago, the rest of the system experienced a moderate increase (3.6 percent) in enrollments. Analysis of instructional program area information, excluding City Colleges of Chicago data, produces mixed results. Relatively little change was exhibited in baccalaureate/transfer (-2.7 percent) programs between 1997 and 2001. Adult education growth was substantial (33.3 percent) over the five-year period. The general associate (38.1 percent) and general studies (6.8 percent) programs recorded higher growth without Chicago data. Little change was evident in the occupational (-0.4 percent) programs between 1997 and 2001. There was a moderate increase (3.2 percent) in the vocational skills programs (see Table A-6b). While occupational credit enrollments have decreased slightly, during the five-year period the number of students enrolled in noncredit courses, many of which are suitable for updating professional skills in business and industry, has increased (19.4 percent). A review of noncredit course enrollments is provided in the next major section of this report.

Instructional Program Enrollments by Gender. During fiscal year 2001, females outnumbered males in all instructional areas; the adult education (ABE/ASE/ESL) programs contained the highest proportion of male students (49.2 percent). The highest proportion of female students (59.7 percent) were enrolled in the general associate program followed closely by the general studies certificate program (59.5 percent) and vocational skills program (58.5 percent). (See Table A-7.)

Instructional Program Enrollments by Racial/Ethnic Origin. Figure 2 illustrates the distribution of minorities in the two largest program areas, baccalaureate/transfer and occupational/career. An examination of each

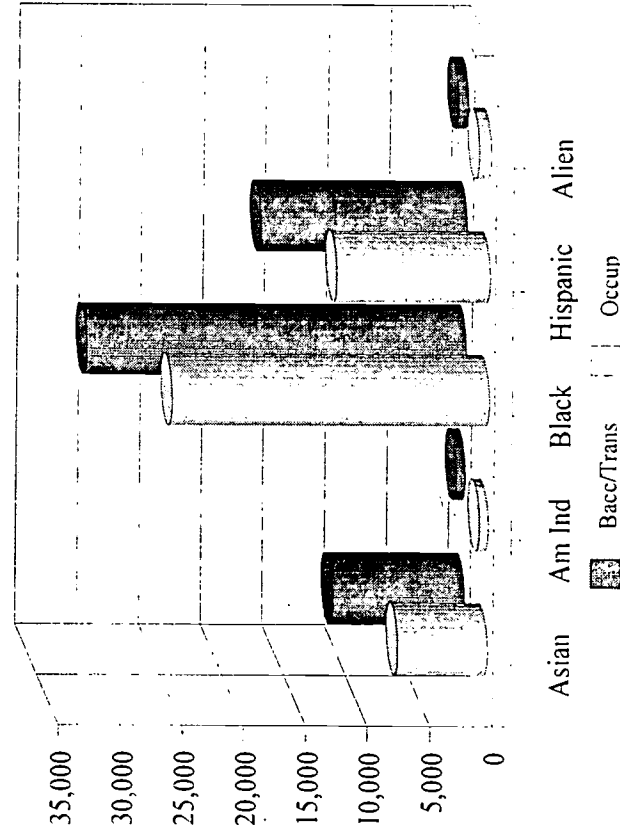

Fig. 2. Fiscal Year 2001 Minority Enrollments in Baccalaureate/Transfer and Occupational Programs

racial/ethnic group's representation across program areas in fiscal year 2001 indicates that the largest percentage of white (40.1 percent), Asian (34.6 percent), Black (33.4 percent), and American Indian (33.6 percent) students were enrolled in baccalaureate/transfer programs. The highest

percentage of Hispanic (49.5 percent) students and Nonresident Alien students (44.8 percent) were enrolled in English as a Second Language programs. Overall, minority students were least represented in the vocational skills (18.8 percent), general studies certificate (22.2 percent), and baccalaureate/transfer (26.2 percent) areas (see Table A-8).

Instructional Program Enrollments by Age. During fiscal year 2001, 43.1 percent of community college students were under 25 years of age. Nearly half (49.6 percent) of the students under 25 were enrolled in baccalaureate/transfer programs. Almost one-third of the student population was between 25-39 years of age; 30.8 percent were enrolled in the occupational program area, while another quarter (27.2 percent) were enrolled in baccalaureate/transfer programs. More than one-fifth of Illinois' community college students were at least 40 years of age. Nearly one-third of students 40 years of age and older were enrolled in occupational programs. Students 40 years of age and older also had substantial enrollments in vocational skills (22.7 percent) and baccalaureate/transfer (20.8 percent) programs. (See Table A-9.)

Largest Occupational Programs. An examination of occupational curricula with at least 5,000 students enrolled during either of the last two years revealed no changes in order according to program size. With nearly 12,400 students, Business Data Programming remained the largest program as enrollment increased by 3.6 percent (429 students). Associate Degree Nursing remained the second largest program, as enrollment increased by 3.7 percent (355 students). Enrollment in Criminal Justice Technology increased by 2.1 percent (159 students), and remained the third largest program. The fourth largest program, Child Care Provider/Assistant remained virtually unchanged (+0.2 percent; +14 students) and Business Administration & Management remained fifth, showing decline in enrollment (-5.2 percent; -289 students).

Instructional Program Enrollments by Intent. Intent data convey the primary goal that the student wants to achieve as a result of his/her studies. Intent data are self-reported by students when they initially enroll at the college. College staff are asked to require students to update this information periodically by providing a current intent, as well as 21

entry intent. An examination of the intent data across program areas illustrates the diversity of student interests and needs that community colleges serve. Three goals combined to represent the aspirations of 56.9 percent of community college students: 26.3 percent were preparing for transfer to a four-year institution, 16.0 percent were improving their basic skills/GED pursuit, and 14.6 percent were preparing for a job immediately after community college.

Examination of student intent by program area reveals interesting observations. With the exception of adult education and baccalaureate/transfer, less than half of the students in any program area were pursuing the particular goal most often associated with a given major. Only 53.2 percent of those students enrolled in baccalaureate/transfer programs indicated that they intend to transfer to a four-year institution. Similarly, just 58.6 percent of the students in occupational programs enrolled with the intent of preparing for a job after community college attendance or to improve their present job skills. About three-quarters of the ABE/ASE and ESL students listed a desire to remedy basic skills deficiencies or to prepare for the GED test as their reason for attending. (See Table A-11.)

Instructional Program Enrollments by Degree Objective. Degree objective data are also self-reported and are designed to assist colleges in classifying students by curriculum or course enrollee category. The objective conveys the student's expected outcome from attending the community college. In fiscal year 2001, 56.7 percent of the students indicated that they were enrolling with no intention of pursuing a degree — only to complete one or several courses. A review of student objectives by program area reveals expected results: 56.1 percent of the baccalaureate/transfer students plan to complete an associate degree, while 38.4 percent are interested in completing one or several courses. Less than half (42.0 percent) of the occupational/career students indicated that they expected to complete an associate degree, while 39.1 percent expected to complete one or several courses. About 18 percent wanted to complete a certificate. These data illustrate the variety of aspirations among students enrolled in community college occupational programs. Many students complete an entire program, while others simply want to improve their current skills or obtain new skills to enter a different career.

Particularly in a strong economy, employers often do not require the completion of a formal certificate or degree, only that individuals acquire the skills necessary to perform specific job duties. In the ESL, general studies, ABE/ASE, and vocational programs, the vast majority (96.8, 94.6, 91.9, and 93.6 percent, respectively) of students planned only to complete one or several courses. (See Table A-12.)

Enrollment Hours by Term and Type of Attendance

More than nine out of ten students attending during the summer term of fiscal year 2001 were part-time (less than nine credit hours). Over 73 percent of the students attended college on a part-time (less than 12 credit hours) basis during the fall semester. The part-time proportion was slightly higher (75.3 percent) in the spring. In a pattern not typical among higher education institutions, Illinois community colleges enrollment during the fall (384,058) and spring semester (386,817) was about the same. (See Table A-13.) Typically spring enrollments would show a larger decrease. Statewide, 204,707 students attended in both the fall and spring semesters.

Highest Degree Earned by Students Prior to Attending Community College

The prior earned degree data reiterate that community colleges serve diverse populations. Figure 3 illustrates the educational background of fiscal year 2001 students. Among the 74 percent of students who reported their prior degrees (excluding adult education students who would typically not possess earned degrees), nearly 18 percent earned some type of postsecondary certificate or degree. More than 14 percent had already earned degrees at or beyond the community college level. (See Table A-14.)

High School Graduation Percentile Rank

High school class rank was reported for about 14 percent of the fiscal year 2001 community college students. Of this population, 4.4 percent were in the top tenth percentile of their graduating class, while 48.4 percent graduated in the top half of their class. (See Table A-18.)

ACT Scores of Community College Students

ACT score data were available for 10 percent of the students. Fifty-eight percent of the students received a 19 or higher on the ACT exam. A minimum of 18 on the ACT exam is typically required for acceptance into many colleges or universities. For those fiscal year 2001 students from whom data were gathered, the average ACT score was 19.4. The median score was 20. (See Table A-19.)

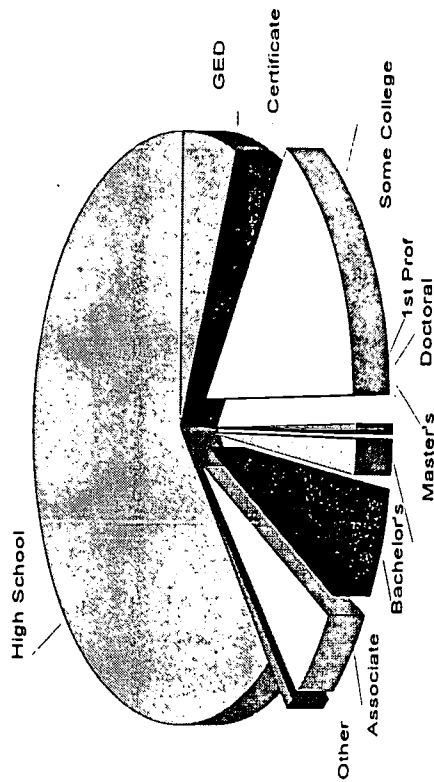

Fig. 3. Fiscal Year 2001
Headcount Enrollment by Prior Highest Degree Earned

Attempted vs. Earned Credit Hours

At all colleges and universities, there are students who, for a variety of reasons, are unable or unwilling to complete the requirements for the class(es) in which they enroll. In 2001, Illinois community college students completed 4,844,390 credit hours, or 73.6 percent of their attempted hours. Overall, part-time students earned a higher percent of attempted hours than did full-time students. (See Table A-15.)

Of the 436,254 students (65.5 percent) for whom data were available, more than two-thirds had accumulated less than 30 college-level hours (freshman level). Nearly 19 percent had accumulated between 30 to 59 credit hours (sophomore status), and 13.5 percent earned 60 or more credits. (See Table A-16.)

Grade Point Averages

Cumulative grade point average data were available for nearly 61 percent of the students enrolled in fiscal year 2001. More than 82 percent of the students had a grade point of 2.01 or above, which is a "C" average or above. Slightly over 36 percent had achieved a grade point between 2.01 and 3.00 ("C" to "B"), while 46.6 percent were in the 3.01 to 4.00 ("B" to "A") range. (See Table A-17.)

FISCAL YEAR 2001 STUDENT NONCREDIT COURSE ENROLLMENTS

Student Noncredit Course Enrollment by Community College

Illinois community colleges provide a wide range of noncredit instruction to meet a variety of community needs. Table 3 contains comparative noncredit enrollment data for the last five years. In fiscal year 1994, the switch from fall to annual noncredit course enrollment survey information occurred. In fiscal year 1999, individual noncredit student records were initially collected. Note that noncredit course enrollment figures for fiscal years 1999 through and 2001 are the higher value of information generated by the Noncredit Course Enrollment Data submission (N1) or the Annual Noncredit Enrollment Survey.

Table 3

SOURCES OF DATA: FY 1995 to FY 1998 Annual Noncredit Enrollment Surveys
FY 1999 and FY 2001 higher value of Noncredit Course
Enrollment Data submission (N1) or Survey.

Fiscal year 2001 was the third year that the Illinois Community College System has gathered an individual student noncredit course enrollment database (N1). As with any new data collection initiative of this magnitude, one can expect a transition period where gradual improvements are made to the process of gathering and reporting the array of requested data takes place. During the transition period, both detailed data (N1) and aggregate data (paper survey) have been gathered.

During fiscal year 2001, 32,371 noncredit course sections were conducted throughout the state or about 4.7 percent fewer than during the previous year. While the rate of increase was slowing prior to fiscal year 2001, this is the first time that the number of courses decreased during the five-year period. From fiscal year 1997 to fiscal year 2001, the total number of course sections offered through the colleges increased 7.0 percent.

Noncredit offerings remain a substantial part of college efforts to meet community and employer needs. As illustrated in Figure 4, student enrollments also decreased since last year. In the past year, the unduplicated noncredit headcount (in which students are counted only once regardless of the number of noncredit courses in which they enroll) decreased 7.7 percent. A longer term perspective shows that unduplicated noncredit headcounts increased 19.4 percent over the last five years. The fiscal year 2001 duplicated headcount (also known as "seatcount") was 11.7 percent lower than the previous year but 8.3 percent higher than five years earlier.

The number of noncredit course offerings and enrollments at the community colleges often vary from year to year, depending on the needs of the surrounding communities. Comparative fiscal year 1997 through fiscal year 2001 figures for noncredit headcount enrollments and course sections conducted for each community college are provided in Appendix Tables B-1, B-2, and B-3.

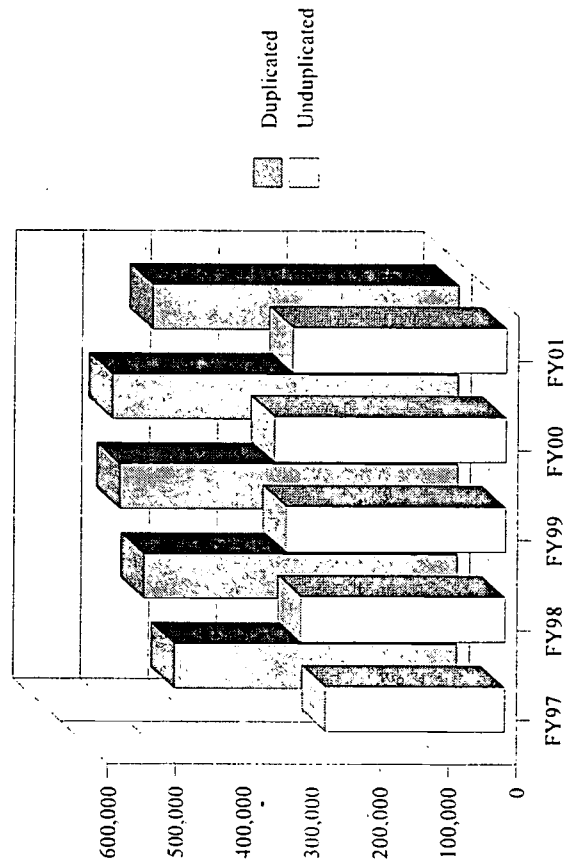

Fig. 4. Noncredit Course Enrollments, FY 1997-2001

Characteristics of Noncredit Students

Even as all three measures of participation in noncredit coursework decreased compared to last year, there were still a sizable number of individuals served by community colleges through noncredit courses. The increasingly stringent data collection requirements may be contributing to reported enrollments leveling off over the past couple of years and actually decreasing this year. Due to extensive work by college officials during the transition to the new data system, sufficient information is available to provide percentages about the characteristics of the students who enrolled in noncredit coursework at community colleges in fiscal year 2001. The following student characteristic information is based on unduplicated counts.

Noncredit Student Gender. Similar to the distribution for credit programs, female students accounted for 57.0 percent of 2001 noncredit enrollments for which gender data were reported. Eleven percent of the gender data were missing. Additional effort to gather these data is encouraged.

Noncredit Student Ethnic Origin. Just over one-quarter of the racial/ethnic data was missing for noncredit students. Minority students accounted for nearly one-quarter of the individuals enrolled in noncredit programs who supplied racial/ethnic data. In credit programs during the past five years, minorities accounted for an average of about one-third of the student population. Available noncredit data indicated the following racial/ethnic distribution: Whites (77.1 percent), Blacks (10.6 percent), Hispanics (7.5 percent), Asians (4.1 percent), Nonresident Aliens (0.4 percent), and American Indians (0.4 percent).

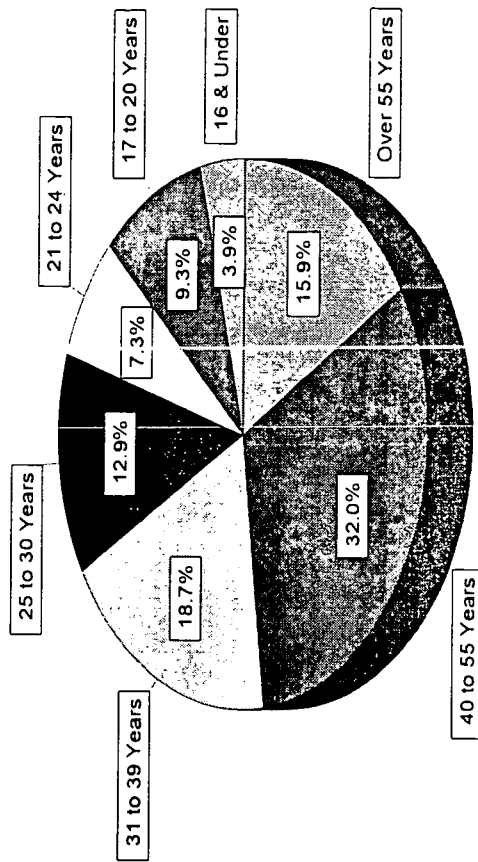

Fig. 5. Age Distribution for Noncredit Course Enrollments, FY 2001

Noncredit Student Age. Based on available data, the average age of students enrolled in noncredit coursework during fiscal year 2001 was 36.3 years and the median age was 35.8 years. Age information was missing for over one-quarter of the noncredit students. As depicted in Figure 5, available data indicates that, during 2001, noncredit programming served a more mature clientele than credit courses. Nearly one-half of the noncredit students were 40 years or above. The largest group of noncredit students were between 40 and 55 (32.0 percent). One-

fifth of noncredit students were under 25 years of age. The 25-39 old age group accounted for nearly one-third of the noncredit enrollments.

Noncredit Category of Activity (Duplicated)

For state reporting purposes, noncredit coursework is grouped into four broad categories. Records were not added to the database unless category of activity information was supplied. Duplicated noncredit enrollment counts are used in the category of activity information in Figure 6.

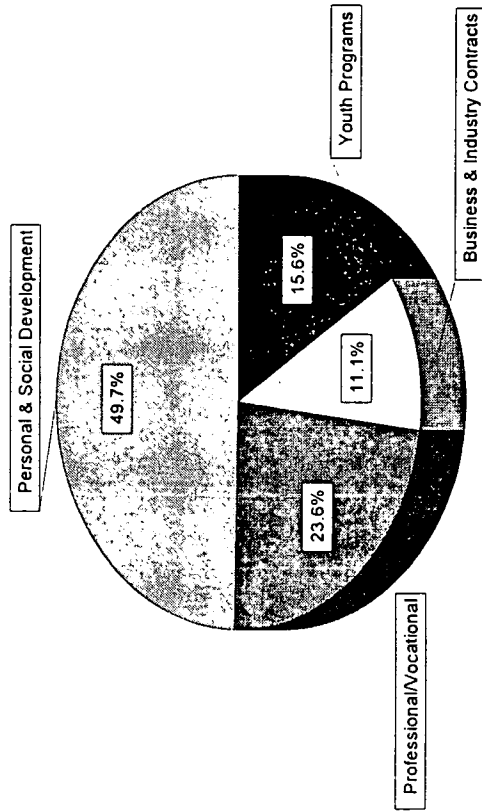

Fig. 6. Category of Activity for Noncredit Course Enrollments, FY 2001

Nearly one-half of the noncredit offerings were in the personal and social development category. Personal and social development programming provides an important community service. Typically, these courses are offered as long as demand is sufficient to at least cover the cost of course delivery. Nearly 35 percent of the noncredit coursework was dedicated to developing workplace skills: professional/vocational (23.6 percent) and business and industry contractual training (11.1 percent). These courses help address a desire among area residents to acquire new skills without earning academic credit. Customized training is an important

economic development activity in which the colleges actively participate. Colleges are relied upon extensively to develop and deliver tailored course content to meet the unique needs of area business, industry, and government. The remaining 15.6 percent served the needs of youth (e.g., learning skills enrichment, athletic skills building, college for kids, etc.).

Overall Largest Noncredit Offerings (Duplicated)

Two-digit classification of instructional program (CIP) codes provide additional information about the areas where noncredit instruction were provided. In future data collection on noncredit coursework, the colleges will be moving toward reporting more detailed information on the kinds of courses they are providing. Seventeen percent of the CIP data were missing. Percentages cited are based on known CIP codes. Across all categories of activity, eight programs (two-digit CIP) had over 10,000 noncredit students enrolled. These eight program areas accounted for approximately 81 percent of the students enrolled in noncredit courses where CIP data were reported. Nearly one-third of these enrollments accounted for in Figure 7 are in work-related programs: business management (16.8 percent), transportation workers (6.2 percent), computer

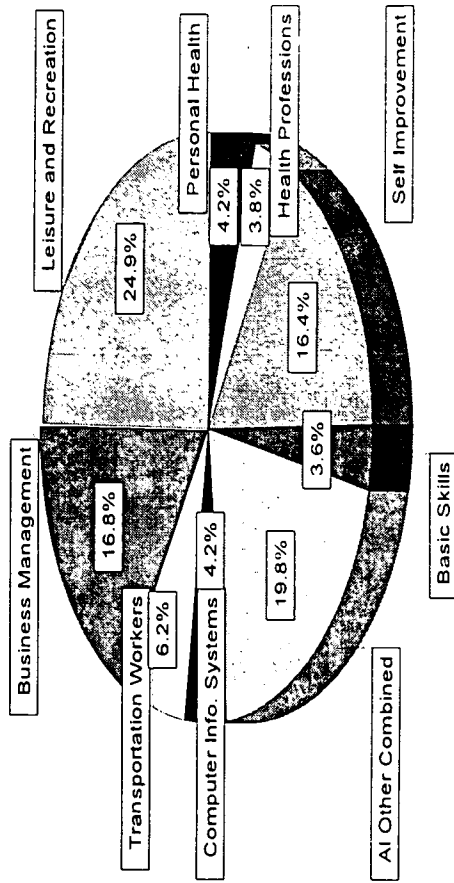

Fig. 7. Largest Noncredit Offerings, FY 2001

information systems (4.2 percent), and health professions (3.8 percent). The "all other category" includes 42 separate two-digit CIP codes. The remaining 49.1 percent were in the following areas: leisure and recreation (24.9 percent), self improvement (16.4 percent), personal health (4.2 percent) and basic skill development (3.6 percent).

Largest Noncredit Offerings by Category of Activity (Duplicated)

Colleges are required to report detailed information in three of the four categories of activity. Details about Youth Program course enrollments are not required.

In the Professional/Vocational Development category Business Management and Administrative Service (N=32,672) related courses accounted for the largest number of duplicated enrollments. Transportation (N=11,590) and Computer and Information Sciences (N=9,537) were other major areas where students enrolled in Professional/Vocational courses.

The largest enrollments in Business and Industry Contract training were Business Management and Administrative Services (N=16,200) and Health Related Skills (N=4,580).

Personal and Social Development enrollments were greatest in recreation (N=76,885) course which included areas such as crafts, exercise, art, dance, and music. Self-improvement (N=53,510) courses also enrolled a sizable number of students.

Overall Noncredit Term of Attendance (Duplicated)

Term of enrollment was provided for all noncredit coursework for fiscal year 2001. The distribution of enrollments by term follows: spring (39.6 percent), fall (33.3 percent), summer (24.9 percent), and winter (2.2 percent). Overall, the distribution is similar to fiscal year 2001 credit offerings with somewhat higher summer noncredit activity and lower fall noncredit enrollments.

Noncredit Enrollment Distribution by Site/Location (Duplicated)

For state reporting purposes, five broad instructional site locations have been identified. Acquiring more complete information about community college facility utilization and needs was one of the underlying reasons for collecting more detailed noncredit data. Complete data were available on the instructional site which show that most enrollment occurs on main college campuses:

- main campus (57.6 percent),
- community-based (16.8 percent),
- off-campus college-owned (12.2 percent),
- off-campus college-leased (7.2 percent), and
- business-based (6.1 percent).

Further information about the differences between the categories follows. Community-based sites are rented or leased and site maintenance and upkeep are the responsibility of the organization furnishing the space. For off-campus college-leased sites, the college controls the property and is responsible for maintenance and upkeep. Off-campus college-owned facilities are college-controlled branch or extension center sites located away from the main campus. Business-based sites are provided by businesses who contract for training services.

The current report contains new information about noncredit enrollments due to extensive efforts by college officials to gather these data using a new format. The level of detail available about noncredit activity is improving via the Noncredit Course Enrollment (N1) data submission.

FISCAL YEAR 2001 COMPLETIONS

Degrees and Certificates Awarded by Community College

The number of collegiate-level degrees and certificates awarded to Illinois community college students in fiscal year 2001 totaled 38,420. Table 4 contains comparative completion data for the last five years. The number of degrees and certificates awarded increased by 10.4 percent over fiscal year 2000. Compared to fiscal year 1997, the total number of fiscal year 2001 completions increased 14.8 percent.

Table C-1 in the appendix provides a comparison of fiscal year 1997 through fiscal year 2001 duplicated completions for each community college. Compared to last year, among the 48 colleges, 30 experienced increases in degree and certificate awards, while 14 exhibited decreases in the past year. Four colleges experienced little or no change.

Table 4

% Change	-1.4%	3.4%	-2.9%	3.8%	10.4%

SOURCE OF DATA: Annual Enrollment and Completion (A1) Records

Degrees and Certificates Awarded by Program Categories

Of the 38,420 completions during fiscal year 2001, 64.1 percent were occupational degrees or certificates. Baccalaureate/transfer degrees accounted for 33.4 percent of all the collegiate-level completions. Among these baccalaureate/transfer degrees, the associate in arts degree was most commonly awarded (60.7 percent). Almost one-third of the baccalaureate/transfer degrees earned were associate in science degrees. The proportion of AA and AS degrees granted has been remarkably stable over the past five years. The total number of transfer degrees awarded was virtually unchanged (-0.1 percent) since fiscal year 2000. Overall, the number of baccalaureate/transfer degrees awarded in fiscal year 2001 showed little change from five years earlier (a decrease of 244 or 1.9 percent).

An examination of the occupational degrees and certificates awarded in fiscal year 2001 indicates that 34.0 percent (8,371) were associate in applied science degrees. More than 46 percent of the completions were for occupational certificates of less than one year. Overall occupational completions are up 18.0 percent compared to last year. This substantial increase is attributable to increases in certificates of one year or more (5.3 percent) and especially to certificates of less than one year (52.9 percent). The substantial increase in certificates of less than one year is mainly due to the implementation of new basic certificates at Harold Washington College. The programs for these certificates were developed under the Workforce Investment Act and consist of intensive two-week credit courses for Food Service Sanitation and Public Service Vehicle training. There was a notable decrease in the number of vocational skills certificates awarded in fiscal year 2001 (194 students or 67.4 percent). A comparison of fiscal year 2001 occupational completions to those awarded five years earlier reveals that the total number of awards increased by 25.9 percent. A closer examination shows increases in three out of four categories: short-term certificates (89.6 percent), long-term certificates (11.5 percent), and vocational skills certificates (14.6 percent or 12 completers).

Summary of Graduates by Degree Categories

Gender of Graduates by Degree Category. During fiscal year 2001, nearly six out of ten degrees and certificates were earned by females. The three degrees and certificates attained by the highest proportion of females were the associate in arts (66.1 percent), associate in applied science (64.6 percent), and vocational skills certificate (71.3 percent). Although small in overall number (92), associate in engineering science — one of the newest degree programs in the Illinois Community College System — had the highest proportion of male graduates (92.4 percent). Certificates of less than one year were the specific award category with the largest number of male graduates (5,569). The male/female distribution within the baccalaureate/transfer degree and occupational degree and certificate areas drive the overall proportion. (See Table C-3.)

Racial/Ethnic Origin of Graduates by Degree Category. Almost 30 percent of all degrees and certificates in fiscal year 2001 were awarded to minority (nonwhite) students. Sixteen percent of all fiscal year 2001 baccalaureate/transfer degrees were earned by minority students, the majority of which were associate in arts degrees (70.3 percent), while 26.0 percent were associate in science degrees. The overall proportion of minority baccalaureate/transfer completers was similar to last year. More than four times as many minority graduates completed occupational degrees and certificates (8,679) than baccalaureate/transfer degrees (2,080). More than twice as many Black students (6,146) completed collegiate-level programs than did Hispanic students (2,742) in fiscal year 2001 (see Table C-4). Figure 8 illustrates the distribution of minority students who successfully completed degree programs in the Illinois Community College System during fiscal year 2001.

Age of Graduates by Degree Category. Slightly over 14 percent of the completers were in the under 21 year old age group. These graduates were predominately (56.8 percent) in baccalaureate/transfer programs. The 21-24 age group accounted for 31.3 percent of the total graduates, while the 25-30 and 31-39 age groups accounted for 18.2 and 17.0 percent, respectively. Slightly over 39 percent of the students 30 and under completed baccalaureate/transfer degrees, while only 13.3 percent

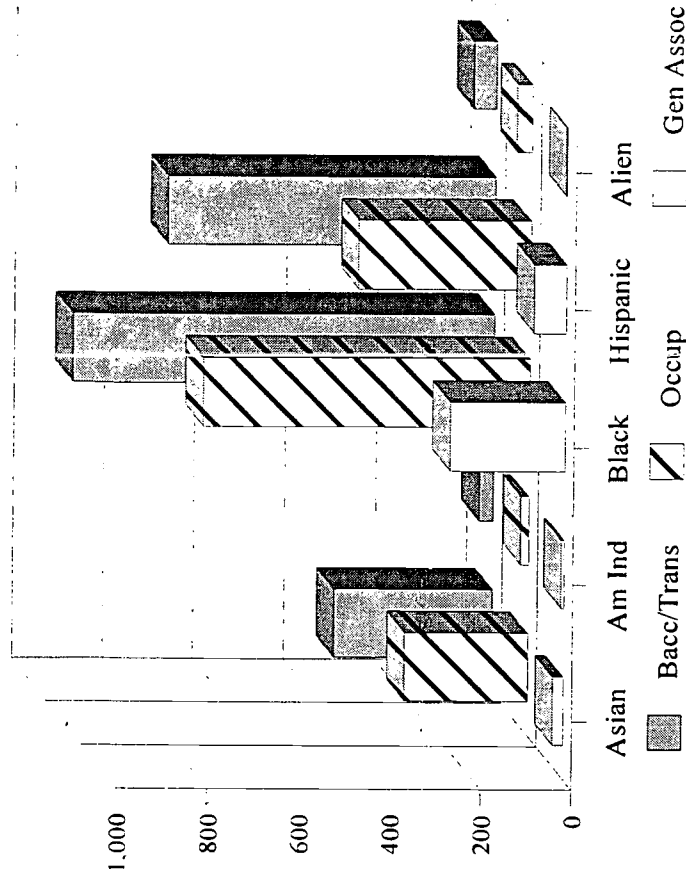

Fig. 8. FY 2001 Associate Degrees Earned by Minority Students

of the graduates over the age of 30 completed baccalaureate/transfer programs. More than four-out-of-five (83.3 percent) of those graduates age 30 or above earned occupational degrees and certificates. Across all age groups, the proportion of occupational graduates increased as age advanced. (See Table C-5.)

Intent of Graduates by Degree Category. Self-reported intent data disclose the primary goal that a student wants to achieve as a result of his/her studies. The community colleges examine current intent versus student intent at the time of initial enrollment at the college. In these analyses, current intent (when available) was analyzed to reflect the changing needs and desires of the community college student. Only 72.5 percent of students who attained a baccalaureate/transfer degree indicated that they intended to prepare for transfer to a four-year institution. Just over one-tenth of these successful students indicated a desire to prepare for a job immediately after community college or to improve present job skills — intent that would most often be associated

with seeking an occupational degree or certificate. Likewise, only 62.2 percent of those students who attained an occupational degree or certificate indicated that they were preparing for a job immediately after completing community college or improving present job skills. Almost one-fifth (18.3 percent) of the occupational graduates indicated that they were preparing for transfer to a four-year institution. Pursuing an occupational degree does not preclude a student from transferring. (See Table C-6.)

Degree Objective of Graduates by Degree Category. The self-reported degree objective provides an indication of the student's expected outcome from attending the community college, and one might anticipate that they would mirror student completion patterns. Nearly 80 percent of the students who earned baccalaureate/transfer degrees in fiscal year 2001 indicated that they enrolled with a desire to complete an associate degree. However, 16.6 percent indicated that they wanted to complete only one or several courses and were not pursuing a degree. A review of occupational graduates reveals the same pattern; 79.5 percent of the occupational students who earned an associate in applied science degree had listed completing an associate degree as their objective, but 19.9 percent of the students who had planned to only complete one or several courses or a certificate ended up surpassing their goal by earning an associate degree. (See Table C-7.)

SUMMARY

As indicated by the demographic data presented in this report, the Illinois Community College System serves a diverse student clientele through a variety of credit and noncredit programs and courses. For students enrolled in credit coursework, more than half are female (55.3 percent), more than one-third are of minority ethnicity, and two out of every five students are 31 years of age or older. Available information on students enrolled in noncredit courses show nearly identical gender representation (56.5 percent female), less minority participation with one-quarter minority noncredit enrollments, and the participation by a more mature

population in noncredit courses with just over two-thirds of the students 31 years of age or above.

In the past year, based on fiscal year 2001 annual data, there was a slight decrease (2.7 percent) in overall community college enrollment. However, community colleges as a whole experienced a fairly substantial increase in completions (10.4 percent). The large number of students (nearly one million) served through both credit and noncredit courses affirms that the Illinois Community College System continues to adapt to the evolving educational needs of the communities the colleges serve.

The Illinois Community College System is here to provide education and training to individuals and assist in economic development. In the systemwide strategic plan — the *Promise for Illinois* — Illinois community colleges pledge to address workforce development needs with flexible, responsive, and progressive programs; offer rigorous courses and programs designed for college and university transfer; expand adult education and literacy programs necessary for individuals and families to improve their lives; equip Illinoisans with technology skills needed for success; emphasize high quality in all programs, services, and operations; deliver affordable learning opportunities to the doorstep of Illinois residents; and model and promote leadership and ethical decision-making. With *The Promise for Illinois* as a guide, the Illinois Community College System will continue to help the state move ahead.
